

Release Notes: Avast Business Cloud Management Console (22nd November 2018)

Console version: 6.5

Agent version: 4.5.37

Antivirus: 18.7

Release Summary

This release contains bug fixes and some enhancements for the Cloud Console.

Enhancements

- To support the migration from Avast Endpoint Protection products to Avast Business Antivirus in the future, we have updated the XML import feature that will now create device policies once XML has been uploaded.

Resolved issues (for bug fixes)

[CBC-6703]	Resolved an issue for email notifications that are sent in French language even though the console is set to English language
[CBC-7205]	VPN is not uninstalled when license has been changed to a different edition (Pro and/or Antivirus)
[CBC-7283]	By default 'Scan at transport level' setting will be set to 'On'
[CBC-6723]	Canada region is now listed once instead of twice when signing up to get a new account at business.avast.com

Known issues

[CBC-7300]	Add install/uninstall functionality for VPN component in consoles
[CBC-6792] [CBC-7010]	Some Mac OS X – (High Sierra) devices are not communicating with the Cloud Console
[CBC-6967] [CBC-7293]	Some devices experiencing issues with update and scan commands not starting from existing Tasks
[CBC-7100]	Unable to activate a device as the local update server
[CBC-7209]	Device name and Platform filter not sorting correctly
[CBC-7299]	Receiving 'Unable to load policy' error message upon installing Avast Business Antivirus

[CBC-7287]	Some Windows 10 devices are using up to 30% CPU
